

10th Cochrane Workshop on Systematic Reviews on Prevention and Treatment of HPV-related Disease.

Organisation: Marc Arbyn, Unit Cancer Epidemiology, Scientific Institute of Public Health, Brussels, Belgium.

Short description: This workshop aims to bring experts together who are involved in ongoing Cochrane reviews or systematic reviews on the following topics: evidence for applications of HPV testing in cervical screening and triage of screen-positive women and prediction of failure and adverse obstetrical effects after treatment of cervical pre-cancer. Future Cochrane work will also include prevention and treatment of other HPV-related cancers (other anogenital cancers and head & neck cancer). Priorities will be defined for future systematic reviews and international collaboration.
